Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If the period for reply specified above is less than thirty (30) days, a reply within the statutory minimum of thirty (30) days will be considered timely.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

DETAILED ACTION

The amendment filed 2/25/04 has been considered in preparing this Office action.

Claim Rejections - 35 USC § 103

1. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

2. Claims 1-4 and 7 are rejected under 35 U.S.C. 103(a) as being unpatentable over Ugajin et al (6,268,869 hereinafter "Ugajin") in view of Moriya (6,449,687).

Ugajin teaches a consecutive reading method for a computer game (Fig. 1) for reading field data (graphics data and texture data) from a storage device (23) into a memory (5 and 11) in a computer, comprising reading (16 and 10) the field data to be resident in memory and displayed on a monitor screen (22). It is noted that Ugajin fails explicitly teach or suggest that deleting segment field data resident in memory and reading new segment field data into memory based on the player's position. This is what Moriya teaches. Moriya teaches at the time a new stage is started (in a new position), the content of the RAM is updated which means the old data in the memory is replaced by the new data (col. 6, line 1 to col. 7, line 23). It would have been obvious to one of ordinary skill in the art at the time the present invention was made to combine the teachings of Moriya into the system of Ugajin in order to replace old memory information by the new information and then display in the screen when the player move from one

position to another (such as, from one stage to another in the game when the player is progressing). Therefore, at least claims 1, 2 and 7 would have been obvious.

As per claims 3 and 4, Ugajin fails to explicitly teach or suggest the size of field data in units of segments and sectors. It would have been obvious to one of ordinary skill in the art at the time the present invention was made to modify the teachings of Ugajin in order to read data in the speed corresponding to the change of the game, the player's progress from one scene to another. Therefore, at least claims 3 and 4 would have been obvious.

Allowable Subject Matter

3. Claims 5 and 6 are objected to as being dependent upon a rejected base claim, but would be allowable if rewritten in independent form including all of the limitations of the base claim and any intervening claims.

Response to Arguments

4. Applicant's arguments with respect to claims have been considered but are moot in view of the new ground(s) of rejection.

Conclusion

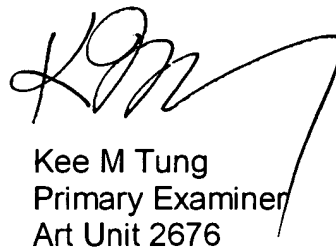

5. Any inquiry concerning this communication or earlier communications from the examiner should be directed to Kee M Tung whose telephone number is 703-305-9660. The examiner can normally be reached on Tuesday - Friday from 5:30 am - 4:00 pm.
